

INSTRUCTIONAL STRATEGIES

Teaching approaches to drive engagement, accommodate learning styles, and intervene where you are needed most to help students succeed.

[Questioning Strategies](#)

Generate questions that will lead students to think more critically, research more effectively, and develop metacognitive thinking to direct their own learning.

SOFTWARE & TECHNOLOGY

Training resources to support better understanding of the use of specific technologies and how they can be leveraged in the learning process.

[Microsoft Office](#)

Whether you are running the latest and greatest or an older version, master popular Microsoft productivity applications including Word, Excel, PowerPoint, and Outlook, as well as Sway, SharePoint, and others.

[Google](#)

Offering a wide variety of free options, Google has become a go-to resource for many schools. Teachers and students alike can learn both the basic and advanced features of Docs, Pages, Slides, Gmail, and others.

[Adobe Creative Suite](#)

Adobe applications are key tools for video editors, graphic designers, web developers, photographers and everything in-between. Get up to speed on the latest features of Photoshop, Illustrator, and more.
