# StudyBlue

Our apps for web, IOS, and Android are designed to help you make the most of your study time, when and where ever you need them.
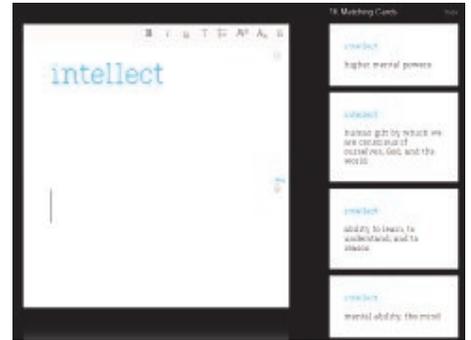

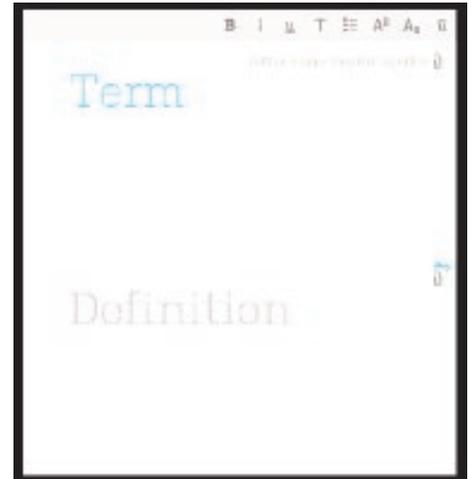

Borrow

You can type in a term, and see what cards come up on the side bar to give you a pre-made flashcard. Select **Add Card** on the top left of your screen, and it will be added to your deck.
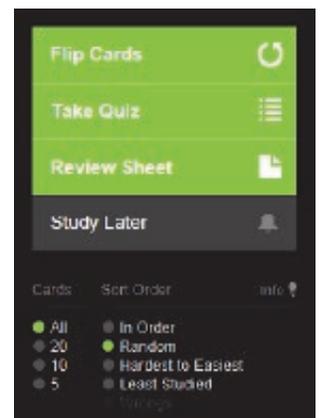

Make

Make your own cards by typing in your own term and definition. When finished, select **Save** or **Add Card** on the top left of your screen, and it will be added to your deck.

Study

You are given many ways to study! STUDYBLUE can flip through your flashcards, create **quizzes**, and even put together **review sheets.**

Collaborate

STUDYBLUE is compatible with:

iOS
Android
Web
Apps

Score

By tracking your progress through quizzes and flashcards, STUDYBLUE will be able to score you, and help you focus on the more challenging terms.

Store

You're given a **Backpack**, where you can store your multiple decks of flashcards. Refer back to your backpack when you want to add or find cards, and even join classes.

Sync it with Evernote!

Collaborate

You are able to **join classes**, if your professor has made one on STUDYBLUE. Professors, and even you, can upload files, and flashcards to share. Once you've joined the class by selecting Add, you will be able to access all of those materials.

Tip for Flashcards

When flipping through flashcards, you will see a green thumbs up, and a red thumbs down picture. If you get the term correct, hit the green thumbs up. If you get the term wrong, hit the red thumbs down.

This will let STUDYBLUE know what term you need a little more time with. It will help track your progress, and you will be able to see your own growth.

## Searching

Not only are you able to search for flashcards, you can also search for classmates and professors who use STUDYBLUE as well.

Happy Studying Everyone!
