

Compatible with both Macs and PCs

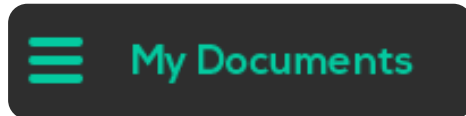

Natural Reader is a professional text to speech program that converts any written text into spoken words.

Highlight text from a PDF or website and select play, the selected text will be read aloud to you.

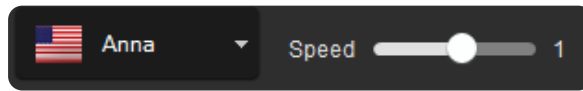

Natural Reader highlights the words as they are read aloud.

Natural Reader can also read text as you type by word or by sentence.

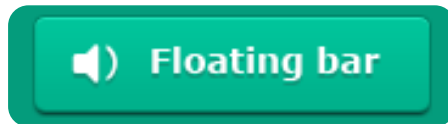

Upload your own documents from your computer, or from the cloud. You can also access Free eBooks!

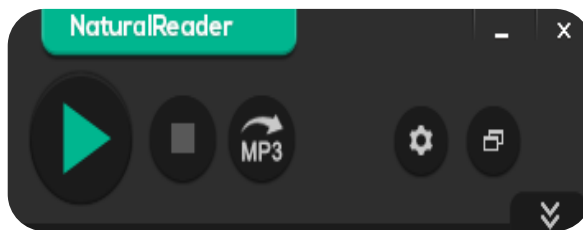

Anna is the only voice that comes with the Free Version, but you can adjust the reading speed.

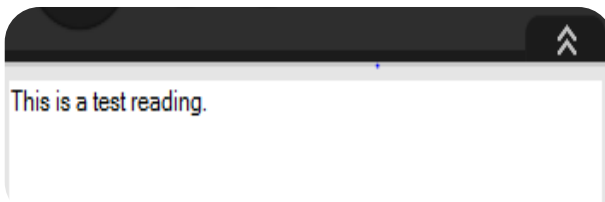

The "Floating Bar" located at the bottom of the window will float over any application you have open.

Play the selected text, from the floating bar. MP3 conversions only come with the paid versions of Natural Reader.

The arrows at the bottom allow you to enter text and have Natural Reader read to you!
